

UB-4000A - Control de soldadura por puntos CC lineal con monitor incorporado (anteriormente conocido como DC29)

El control de soldadura por resistencia CC lineal UB-4000A es un control CC lineal de 200-4000 amperios con cuatro modos de retroalimentación que se ha diseñado para adaptarse a las piezas y a las variables del proceso. La energía de soldadura se puede programar en corriente, tensión, potencia o V-A, en incrementos tan cortos como 0,01 milisegundos. Por lo tanto, este soldador por puntos es ideal para las aplicaciones pequeñas de los mercados de los componentes electrónicos y las baterías.

Especificaciones UB-4000A - Control de soldadura por puntos CC lineal con monitor incorporado

- Cuatro modos de control: corriente, tensión, potencia y V-A (tensión-corriente)
- Entrada monofásica
- Tamaño compacto
- Programas de doble pulso
- Forma de onda reproducible y controlada con precisión
- Tiempo de subida muy rápido
