

Fiber Laser Welders - 1070nm

AMADA WELD TECH

An increasing number of applications now demand higher precision control, lower heat input and lower electrical energy consumption. AMADA WELD TECH provides fiber lasers that offer the precise control needed for fine cutting, welding small components and the penetration welding of metals.

Fiber laser sources from 100 to 5000W are available in both single and multi-mode configurations and may be operated in either pulsed or continuous wave mode, ensuring successful application across a broad range of production requirements.

Product variants:

LF Series - 160-1000W Yb:Fiber Laser Welders

ML-6500C - 300 W Fiber Laser Welder

ML-6700B - 500W Fiber Laser Welder

ML-6810B - 1000-1200W Fiber Laser Welder

ML-69B Series - 2000 W - 5000 W Fiber Laser Welder

Related Applications:

Laser Welding Drug Pumps

Laser Seam Welding Electronic Packages

Laser Welding Sensors
